Summary

Full-Stack Software Engineer (MERN) and Computer Science graduate with experience building **production-grade web systems** and integrating **AI-powered features**. Strong background in **React, Node.js, Express, MongoDB**, RESTful APIs, and authentication, with hands-on exposure to **machine learning and computer vision**. Proven ability to ship scalable applications used in real institutional environments.

Experience

Software Engineering Intern — IT Wing & Project Management Unit

Jun – Aug 2025

National Assembly Secretariat, Islamabad, Pakistan

- Designed and developed a **Case Management & Tracking System** for the Litigation Department using the **MERN stack**, replacing manual workflows with a centralized digital platform.
- Implemented **secure authentication, role-based access control (RBAC)**, and modular management of cases, courts, judges, and users.
- Built RESTful APIs and integrated MongoDB for structured data storage, indexing, and efficient retrieval.
- Developed **printable and downloadable reports** with official institutional branding for legal documentation.
- The system is to be deployed on an internal VM within a local network, following real-world infrastructure constraints.

Projects

Case Management & Tracking System — MERN Stack

- End-to-end litigation management platform featuring dashboards, case lifecycle tracking, user management, and reporting.
- Designed for internal government deployment with emphasis on data integrity, access control, and maintainability.

Movies Web Application — React, TypeScript, Node.js, Express, MongoDB

- Built a full-stack movie discovery platform with JWT-based authentication, user profiles, favorites, and dashboards.
- Integrated the TMDB API for trending and searchable content with a RESTful backend.
- Implemented debounced search, optimized API calls, and a responsive UI using Tailwind CSS.

Image Enhancement using Deep Learning — Python, CNNs

- Developed a deep learning pipeline for image enhancement using convolutional neural networks.
- Focused on preprocessing, model experimentation, and qualitative evaluation of enhanced outputs.

Technical Skills

- **Front-End:** React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Shadcn UI
- **Back-End:** Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** MongoDB, MySQL, Firebase, Supabase, Appwrite
- **AI / ML:** Python, PyTorch, CNNs, Image Processing, Model Inference
- **Tools:** Git, Docker, Postman, Cursor, Copilot CLI, Antigravity
- **Methodologies:** Agile, Scrum

Education

BS Computer Science, Sukkur IBA University

Sept 2022 – May 2026

- Awarded a **four-year fully funded scholarship** for academic excellence.
- Relevant Coursework: Enterprise Application Development, DSA, AI, Deep Learning, Computer Vision

Leadership & Involvement

Executive Member, Computer Science Society

Sept 2023 – Sept 2025

- Organized coding competitions and technical events with 60+ participants.
- Coordinated project expos and promoted peer learning initiatives.

Campus Co-Lead, AI Community of Pakistan

Jan 2025 – Jan 2026

- Organized AI-focused webinars and events connecting students with industry professionals.
- Facilitated discussions on real-world AI applications and career pathways.

Certifications

Learn React: Introduction (Codecademy) • Version Control (Git) — Meta (Coursera) • Analyze Sentiment with Natural Language API (Google Cloud) • Google Cloud Compute Basics (Google Cloud)
